PROFESSIONAL SUMMARY

Detail-driven Computer Science student experienced in building REST APIs using FastAPI. Maintain and build a finance portal specialised in helping UTP stakeholders manage customers by reducing manual verification by 60%. Skilled in backend, artificial intelligence and database development, with strengths in database analysis and performance optimization.

EDUCATION

Universiti Teknologi PETRONAS (UTP), B. Sc. Computer Science (Hons.), Seri Iskandar, May 2026 – Present

- Year of study: 2nd Year 1st semester (Current CGPA: 3.50)

Universiti Teknologi MARA (UiTM), Dip. CS., Tapah Campus, Sept 2023 – Mar 2026

- Total year of study: 2 years 6 months (CGPA:3.78)

PROFESSIONAL EXPERIENCE

Web Developer (Job on Campus), Universiti Teknologi PETRONAS (UTP), Seri Iskandar, Nov 2026 – Present

- Mentored 2 student interns on Git workflows and production standards, driving code quality and cutting project delivery time by 25%.
- Enhanced application security, addressing legacy vulnerabilities and safeguarding sensitive vendor records across 1000+ quarterly transactions.

Web Developer Intern, Universiti Teknologi PETRONAS (UTP), Seri Iskandar, Sept 2025 – Feb 2026

- Using FastAPI and PHP as backend, proposed a financial portal for the UTP Finance department and CEE Study Plan which help 100 Civil Engineering students plan their academic structure.
- Translated non-technical requirements into technical solutions, collaborating directly with the Senior Executive and Head of Department on multiple data analytics tasks and research on 2000+ UTP civil engineering alumni.

PROJECT

CEE Study Plan, Backend Development

Tech Stack: FastAPI, React, Supabase, Render and Vercel

- Developed a full-stack academic planning tool used by 100+ CEE students to monitor course completion and GPA progression in real time while integrated HuggingFace API to provide AI feedback on student performance as an intern.
- Architected a clean 3-layer REST API using FastAPI, React, Supabase and deployed on Render for backend and Vercel for frontend.

UTP Vendor Code Requisition (UTP VCR), Full-Stack Development

Tech Stack: Native PHP, HTML, CSS, Javascript, Aiven, Render, Docker

- Built and deployed a centralized vendor code requisition portal that cut manual verification workload by 60% by digitizing a previously email-based approval process.
- Implemented a 3-stage verification workflow with role separation between standard users and 3 admin tiers to ensure 1000+ of confidential documents have been verified by respective admin.

Bouncer, Full Stack Development

Tech Stack: FastAPI, React, Docker, Redis, Web Socket and Supabase

- B2B SaaS platform ("Waiting Room as a Service") designed to protect high demand drops (concert tickets, limited-edition sneakers, etc.) from scalper bots and server crashes.
- Bouncer routes inbound traffic dynamically based on each client's subscription that have 3 tier which is the digital dam, anti-bot WAF and the scalper killler.

SKILLS

- **Frameworks & Library**: FastAPI (Intermediate), React (Intermediate), Flask (Basic), Spring Boot (Basic), Django (Basic), Flutter (Basic)
- **Programming Language**: Python (Intermediate), Java (Basic), PHP (Intermediate), Visual Basic (Basic), HTML/CSS (Intermediate), JavaScript (Basic), C++ (Basic)
- **Application Technologies**: Github (Intermediate), Oracle VirtualBox (Basic), Burpsuite (Basic), Docker (Basic), Render (Intermediate), Vercel (Intermediate)
- **Database**: PHPMyAdmin MySQL (Intermediate), Supabase Postgresql (Intermediate), Apex Oracle (Basic), Aiven (Intermediate)
- **Languages**: Natives in Malay, Fluent in English
- **Professional Skills**: Problem-Solving, Critical Thinking, Adaptability, Time Management

CERTIFICATES

- Vice Chancellor Awards (5x Dean's List) – Universiti Teknologi MARA (Dip. CS.)
- Bug Bounty Hunting | How Hackers Find Bugs | Red Teaming Level 0 – 0Day Academy
- Intro to Github Workshop | React and Copilot Workshop – Google Developer Student Club (GDSC)
- UMHackathon 2026 – PEKOM Universiti Malaya
- Devcon 2k24: Hackblast – DISK UiTM Tapah

LEADERSHIP & EXTRA-CURRICULAR ACTIVITIES

- Project Director, AWS Workshop, GDSC, UTP
- Technical Department Member, Syntech, UTP
- Technical Development Department Member, GDSC, UTP
- Committee, Falcon Intervarsity Cup, UTP
- Volunteering (SMK Seri Iskandar), MPU4, Edumate, UTP
- Committee, Frost It Up, Event Management, UTP
