SUMMARY

Backend-focused developer experienced in building REST APIs using Spring Boot and FastAPI. Maintain and build a finance portal specialised in helping UTP stakeholders manage the customers by reducing manual verification by 60%. Skilled in backend, frontend and database development, with strenghts in UI design, database analysis and performance optimization. Adaptation through learning defines my path in software development.

EDUCATION

Universiti Teknologi MARA Cawangan Perak Kampus Tapah

September 2023 – February 2026

Diploma in Computer Science (CS110)

- Cumulative GPA: 3.78 | **Vice Chancellor's Award**

PROJECT

CEE Study Plan

Backend API Development

- Architected a clean 3-layer REST API using **FastAPI**, **React**, and **Supabase**, deployed on **Render** and **Vercel** for reliable uptime.
- Developed a full-stack academic planning tool used by **100+** CEE students to monitor course completion and GPA progression in real time and integrated **HuggingFace API** to provide AI feedback on student performance

UTP Vendor Requisition (UTP VCR)

Full-Stack Development

- Built and deployed a centralized vendor code requisition portal that cut manual verification workload by **60%** by digitizing a previously email-based approval process.
- Implemented a **3-stage verification** workflow with role separation between standard users and 2 admin tiers, ensuring accountability at each approval step.

PROFESSIONAL EXPERIENCE

Universiti Teknologi PETRONAS

September 2025 – February 2026

Tech Stack: FastAPI, React, Supabase, Native PHP, MySQL

Website Developer Intern

- Using FastAPI and PHP as backend, proposed a financial portal for the UTP Finance department and CEE Study Plan which help students plan their academic structure.
- Translating non-technical requirements into technical problem statements and manage learned that communication is just as important as the code itself.

Social Media Admin

- Includes building and drafting a poster for certain events that involve CEE departments, infographic posters and celebrations such as Christmas and Deepavali.

CERTIFICATES

- DEVCON 2K24: Hackblast by DISK Tapah
- UMHackathon 2026 by PEKOM
- 5x Dean's List Award: Diploma in Computer Science (CS110) 2023 – 2025
- Introduction to TensorFlow for Artificial Intelligence, Machine Learning and Deep Learning by DeepLearning.AI

SKILLS

Programming Language: Python (Intermediate), Java (Intermediate), PHP (Intermediate)

Frameworks & Library: FastAPI, React, TensorFlow

Database: MySQL, Postgresql

Languages: Natives in Malay, Fluent in English
